USE OF NON-GAAP FINANCIAL MEASURES We disclose supplemental financial measures calculated and presented in accordance with US GAAP; however, throughout this Quarterly Report we provide certain financial information on a non-GAAP basis (non-GAAP financial measures). We provide non-GAAP financial measures to provide information that may assist investors in understanding our results of operations and assessing our prospects for future performance, which consist of constant currency measures. We believe evaluating certain financial and operating measures on a constant currency basis is important as it excludes the impact of foreign currency exchange rate fluctuations that are not indicative of our core results of operations and are largely outside of our control.

However, our non-GAAP financial measures are not intended to represent and should not be considered more meaningful measures than, or alternatives to, measures of financial or operating performance as determined in accordance with US GAAP. We calculate our constant currency non-GAAP financial measures for current period financial information, such as total net sales using the foreign currency exchange rates that were in effect during the previous comparable period, excluding the effects of foreign currency exchange rate hedges and remeasurements in the condensed consolidated financial statements. We also report comparable DTC sales on a constant currency basis for DTC operations that were open throughout the current and prior reporting periods, and we may adjust prior reporting periods to conform to current year accounting policies.

The information presented on a constant currency basis, as we present such information, may not necessarily be comparable to similarly titled information presented by other companies, and may not be appropriate measures for comparing our performance relative to other companies. Constant currency measures should not be considered in isolation as an alternative to US dollar measures that reflect current period foreign currency exchange rates or to other financial or operating measures presented in accordance with US GAAP. **SEASONALITY** Refer to Note 1, "General," of our condensed consolidated financial statements in Part I, Item 1 within this Quarterly Report and to Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of our 2025 Annual Report for further information regarding the impacts of seasonality on our business.
